It's that time again, per the CCF Bylaws, the 2023 officer nominations need to be submitted to the current board by the October 15th board meeting. Once all nominations are received we will put together a voting ballot for the members. The 2023 officer nominations will be announced in the October edition (next edition) of the club newsletter. If you need a mail in ballot to vote in the election that will take place at the November board meeting, one will be included in the next newsletter. The mail in ballots and the ballots from members that are present at the November meeting will be counted at the end the November board meeting (Nov. 19th). A simple majority vote for each position will decide who will be serving on next year's board. The CCF Board of Directors for 2023 will be announced at the December Christmas party. I encourage everyone to participate in the voting process and/or nominate yourself or another member to serve as a board member.

Stay tuned for the announcement of the date of the CCF Christmas party. Last year's party was held at the field and was huge success so we'll most likely do that again this year. In the typical CCF tradition, we'll have an awesome holiday raffle at the party like we always do. Most likely we'll have the party on the first or second Saturday in December in lieu of a December board meeting.

CCF BOARD MEETINGS ARE HELD AT DELEO FIELD on the 3rd Saturday of the month at 11am. The next meeting is on Saturday, October 15th. Stay well and see you at the field!

On final approach - Rick

Circle City Flyers is a group of people who love RC flying.

Normal folks, who find the utmost joy in creating and flying wonderful machines that inspire awe and put just a bit of color in the sky.

CCF is a non-profit, AMA affiliated flying club.

The CCF has one of the best flying facilities in Southern California. We are located just south of Corona, California, just a few minutes from the 15 Freeway.

The club is well established and member's interests range from helicopters to 3D Planes. We fly gas, turbines, electric, glow, scale, profiles and combat wings. We have RC pilots who have flown for 40+ years, and beginners who are just learning the joys of flight. Got a question? Just learning? Curious? Come on down!

You can find folks flying most days, with the weekend mornings being very popular. Mornings are calm with winds generally increasing throughout the day.
